DEPENDABLE LIGHTING WHEN YOU NEED IT

With their solid brass construction, dual gas line entry options and unique adjustable air shutter (providing optimum lighting in all atmospheric conditions). Falks Gas Lights are the indoor gas light choice for the discriminating buyer.

Available in propane and
natural gas models

FALKS
Indoor Gas Lights

LIGHTING YOUR WAY
FOR OVER 70 YEARS

FALKS Indoor Gas Lights

For decades, homes, cottages, cabins, trailers and boats have depended on Falks Indoor Gas Burning Lights for primary, decorative and emergency lighting needs.

Anywhere permanent lighting is required without the use of electricity, Falks Gas Lights provide a unique, attractive, dependable solution.

Falks Lights are constructed of solid polished brass and utilize a unique adjustable air shutter which provides for the brightest light regardless of altitude or changing atmospheric conditions. Each fixture produces a comparable light to that of a 60 watt electric bulb. Dual gas line entry options allow for hassle free installation in any room.

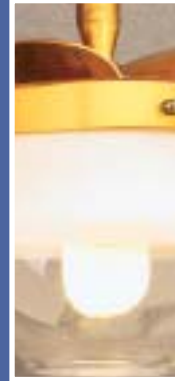

SOLID BRASS DESIGN

Falks polished brass lights are still crafted and hand assembled in the original design. They grace any environment with their classic looks, and Pyrex® round half-frosted traditional style globe.

WARM, FRIENDLY GLOW

- Enjoy the soft, friendly ambience of gas lighting
- Single - 60 watt equivalent
Double - 120 watt equivalent

UNIQUE ADJUSTABLE AIR SHUTTER

Only easy-operation Falks have our unique adjustable air shutter.

- Just turn on and light
- Maximizes light output at high altitudes
- Clean burning - globe doesn't discolour or carbon up.

ECONOMICAL OPERATION

- Single lamp gas consumption - 1900 Btu/hr
 - 11 hours of light per lb of propane
- Economical - only a few pennies per hour
